

## Art. 969 POLYPLAN Tent Manege Type I

Circus- and festival tents stand out for their size, look and functionality. The membrane contributes to the realization of such tents by its relative light weight in relation to its strength. Varying colours on the outside and inside allow to manufacture striped covers. The block-out function darkens the scene and creates a unique artistic atmosphere and special light effects. Polyplan Tent Manege welcomes you – come on in!

Weight:	825 g/m <sup>2</sup>
Width:	250 cm
length:	200 m
Type I-V:	Type I
Max. tensile strength:	3300/3000 N/5cm
Tear strength:	300/250 N
Application:	Halls & Tents, Tensile structures
Surface:	high gloss, lacquered, PVDF
Properties:	block-out, flame-retardant, fungicide finish

- Block-out -> light-blocking layer in the membrane's core allows to darken a room and a multi-coloured design of the tent roof
- Duo-coating -> outside and inside of the membrane can have different colours
- Type I -> good tensile strength
- flame-retardant -> compliance with current safety standards
