

Art. 953 004 COMPLAN Side Curtain View

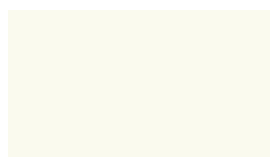

Highly translucent membranes are used to divide inner spaces without darken them. A sturdy base fabric provides the necessary mechanical strengths and stability, while a transparent, weather-resistant PVC-coating allows a sufficient amount of light to pass through the fabric. This is a strong panama base fabric with translucent PVC-coating and optimised light-transmission factor.

Weight:	900 g/m ²
dimensions:	upon request
Max. tensile strength:	4300/4000 N/5cm
Tear strength:	600/530 N
Application:	Industry, Roll doors, Side curtains
Surface:	high gloss, lacquered, special

- Panama fabric with 900 g/m² -> strong and stable membrane
- Transparent coating -> maximum light transmission and light usage
- High-quality PVC-coating -> optimal withering resistance and durability
