

Art. 659 #B# POLYPLAN Tent Manege Type III

Circus and festival tents stand out for their size, look and particular nature. The membrane is the perfect building material for such tents thanks to its relative light weight in relation to its high strength. Different colours on the outside and inside allow manufacturing striped covers. The block-out function darkens the scene, creating a unique artistic atmosphere and providing the canvas for special light effects. Polyplan Tent Manege welcomes you – come on in!

Weight:	1200 g/m ²
dimensions:	upon request
Type I-V:	Type III
Max. tensile strength:	5600/5400 N/5cm
Tear strength:	950/800 N
Application:	Halls & Tents, Tensile structures
Surface:	high gloss, lacquered, PVDF
Properties:	block-out, flame-retardant, fungicide finish

- Block-out -> the light-blocking layer in the membrane's core allows darkening a room and creating a multi-coloured design of the tent roof
- Duo-coating -> the outside and inside of the membrane can have different colours
- Type III -> strong and dimensionally stable
- Flame-retardant formulation -> compliance with current safety standards
